

Hrithik DEEP | Software Engineer | Data Scientist

India | dhrithik4567@gmail.com | github.com/Hrithikdeep | linkedin.com/in/hrithikdeep/ | +91 6201282783

SUMMARY

Software Engineer and Data Scientist experienced in building production-scale digital platforms and data-driven Systems. Previously worked as a Data Science Intern at Springer Capital (USA), developing predictive models and financial dashboards. Currently building enterprise software including retail ERP platforms and digital identity systems using Next.js, React, Flutter, Supabase, and AWS.

EDUCATION

- Bachelor of Computer Applications (BCA) 2020 – 2024
MMHAPU Patna —

ADDITIONAL

- Built and deployed multiple production systems for real-world organizations
- 30+ GitHub repositories demonstrating AI, data science, and full-stack engineering projects

WORK EXPERIENCE

Software Engineer

MSPJ Enterprises — India | Sep 2025 – Present

- Built a multi-location retail ERP platform used across 10+ showrooms supporting billing, inventory, and warehouse stock transfers.
- Developed full-stack architecture using Next.js, React, Supabase, and PostgreSQL.
- Implemented role-based access control for showroom operators and centralized admin management.
- Built analytics dashboards to monitor revenue trends, product performance, and sales insights.
- Deployed backend infrastructure on AWS ensuring scalable transaction processing.

Full Stack Developer

Construction Worker Union Bihar – Digital Welfare Platform

- Developed a scalable labor welfare platform with 10,000+ active members supporting QR-based identity verification.
- Built Flutter mobile application for field agents to register workers and generate digital labor IDs.
- Developed admin dashboard to manage worker approvals, agents, and verification processes.
- Built public portal enabling labor registration and ID verification services.

Data Science Intern

- Springer Capital — Chicago, USA (Remote) | Apr 2025 – Aug 2025
- Developed predictive models improving investment targeting accuracy by 15%.
- Optimized SQL pipelines reducing portfolio analysis time by 30%.
- Built Tableau dashboards for financial KPI monitoring and portfolio analytics.
- * Deployed machine learning pipelines on AWS for scalable analytics.

PROJECTS

Retail ERP System

* Developed production ERP software for retail businesses handling billing, inventory, warehouse transfers, and analytics dashboards.

Tech: Next.js, React, Supabase, PostgreSQL, AWS

Digital Labor Identity Platform

* Built QR-based worker identity verification platform managing labor registration and digital ID validation.

Tech: Flutter, Next.js, Supabase, PostgreSQL

TECHNICAL SKILLS

- Programming:** Python, JavaScript, TypeScript, SQL
- Frontend:** React, Next.js, Flutter, Tailwind
- Backend:** Supabase, PostgreSQL, REST APIs
- Cloud:** AWS, Docker, Vercel
- Data Science:** Machine Learning, Statistical Analysis, EDA
- Visualization:** Tableau, Power BI, Matplotlib
